2985 Innsbruck Drive
Redding, CA 96003
For questions call (530) 222-1917

California law requires companies to have an Injury & Illness Prevention (IIPP) program. Failure to comply with this law is one of the TOP CITATIONS IN THE CONSTRUCTION INDUSTRY & may result in heavy fines and shutdowns for the Company, along with both criminal and civil prosecution for company officers and supervisors that are held responsible.

An effective IIPP will not only save you \$thousands\$ in potential Cal-OSHA Citations, but can also help reduce occupational accidents and injury rates, lower workers' compensation premiums, and increase employee productivity.

This class will brief you on the IIPP standard and what you must do to comply with the Regulation, as well as advise you in some of the more cost-effective approaches to implementing the program. In this hands-on workshop you will learn how to write a cost-effective, fully compliant IIPP by actually writing your company's IIPP in the class!

→ Elements of a compliant Injury and Illness Prevention Program:

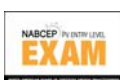

- Designated Responsibilities.
- A system for identifying and evaluating the workplace hazards.
- Methods for correcting unsafe or unhealthful work practices or conditions.
- Safety and Health training.
- A system for communicating with employees on safety and health issues.
- A system for ensuring that employees comply with safety and health practices.
- A system for investigating and acting upon reported work related illnesses, injuries and incidents.
